50 Red Hot Burning Clover Link™

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is $ 0.50.
- The maximum bet per round is $ 10.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 5 reels and 50 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All prizes are for combinations of a kind, consecutive from left to right starting with the leftmost reel on selected lines, except Scatters.
- Highest win only paid on each selected line and per scatter combination.
- Scatter symbols pay regardless of their position.
- Scatter wins and line wins are added.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.49 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Clover Feature

- 5 or more scattered clovers of any color trigger the CLOVER FEATURE with 3 re-spins.
- The clovers that triggered the CLOVER FEATURE are held and all other positions are re-spun.
- Appearing new clovers during the CLOVER FEATURE are also held and the number of remaining re-spins is reset to 3.
- The CLOVER FEATURE ends when either no re-spins are remaining or when the screen is fully filled with clovers.
- All visible prizes on clovers are awarded at the end of the CLOVER FEATURE.
- All CLOVER FEATURE games are played using the same bet as the spin which triggered them.

A fullscreen of 15 clovers during the CLOVER FEATURE doubles all visible prizes, including MINI and MINOR BONUS, but excluding GRAND and MAJOR JACKPOT.

Bonus Symbols

GOLDEN CLOVER
Appears multiple times during the base game and CLOVER FEATURE. Paid only during the CLOVER FEATURE. Available prize multipliers are up to 100 times of total bet. In case of a jackpot win up to 400 times of total bet.

GRAND JACKPOT CLOVER
Appears on 1st, 3rd and 5th reel during the base game and CLOVER FEATURE, with 1 being the leftmost, and 5 being the rightmost reel. Pays immediately when it appears on all three reels. If only one or two GRAND JACKPOT CLOVER symbols appear during the CLOVER FEATURE they will transform into GOLDEN CLOVER symbols with prize multipliers.

MAJOR JACKPOT CLOVER
Appears only once per base game or CLOVER FEATURE. Pays immediately upon appearing.

MINOR and MINI BONUS CLOVER
Can appear multiple times during the base game and CLOVER FEATURE. Paid only during the CLOVER FEATURE. Pays each time it appears on screen during the CLOVER FEATURE.

BONUS STAR

Jackpots

- 0.95 % of every stake goes directly into the jackpots.
- Each jackpot is the sum of its base win plus the contributions from all players to this jackpot.
- The Grand Jackpot is a combination of contributions by all players plus a base win of your total stake x20000.
- The Major Jackpot is a combination of contributions by all players plus a base win of your total stake x1000.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- Subsequent players will win the reseeded jackpot, plus any new contributions.
- There is no ceiling value for the jackpots.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.

Gamble

- With your current stake, a maximum of $ 500.00 can be bet while in the gamble feature.
- For higher wins or during autoplay, the gamble feature is not available.
- Any base game wins that coincide with a CLOVER FEATURE trigger are part of the feature game win and cannot be gambled.
