

9 Line Fortune™

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is € 0.10.
- The maximum bet per round is € 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Pay Lines

- This game has 3 reels and 9 pay lines.
- You can find an overview of the pay line pattern via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All prizes are for combination of a kind, consecutive from left to right on selected lines and starting with the leftmost reel.
- Only the highest win per line is paid.
- Line wins are added.
- The Wild symbol (Fortune) counts for all symbols except: Fortune 2x, Fortune 3x, Fortune 5x and Wheel of Fortune.
- The symbols Fortune 2x, Fortune 3x and Fortune 5x multiply the winning combination where it is part of by 2, 3 or 5 respectively.

Bonus Symbols

- 3 Wheel of Fortune symbols on a pay line trigger the FORTUNE GAME.

RTP Range

- The theoretical RTP (return to player) value for this game is 93.70 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 10 seconds absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Win Spins & Nudges

- In case a spin did not result in a win the player might be awarded with a Win Spin on a random basis. When this is the case the text "Win Spin" will appear in the reel window for a short while and all 3 reels will spin to a winning combination.
- In case a winning combination can be obtained by stepping just 1 reel a Nudge might be offered on a random basis. When this is the case the text "Nudge" will appear in the reel window and 1 reel will make one step (Nudge) to complete the winning combination which will be awarded to the player.
- A Win Spin or Nudge is free and will cost no bet.

Fortune Game

- 3 Wheel of Fortune symbols on a pay line trigger the FORTUNE GAME.
- A wheel with prizes will appear.
- Press the Spin button, Start button or swipe the wheel to get it spinning.
- When the wheel lands on a prize, you win an amount equal to this prize multiplied by your bet.
- When the small wheel lands on a green re-spin segment the big wheel can be spun again.

Jackpots

- 3.0 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- The amount you are eligible to win will be shown in the jackpot banks.
- When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win.
- Each jackpot is the sum of its base win plus the contributions from all players to the jackpot.
- The base win of each jackpot depends on your stake. The base win is 5000 times your stake for the Grand Jackpot, 500 times your stake for the Major Jackpot.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- Subsequent players win the base win for their selected stake, plus any new contributions.
- There is no ceiling value for the jackpots.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.
