GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 4 000.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Ways

- The game is played on a game board with a grid of 6 reels and 5 rows.
- Symbols pay at any position on the game board according to the information in the paytable.
- All prizes are for combinations of a kind.
- The highest win is only paid per winning combination and per scatter combination on the game board.
- The payout for 12 or more symbols appearing on the game board at the same time is the same.
- The payout for 10 or 11 symbols appearing on the game board at the same time is the same.
- The payout for 8 or 9 symbols appearing on the game board at the same time is the same.

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- Scatter wins and winning combination wins are added.
- Scatter symbols pay at any position on screen.
- Individual wins from the winning combinations during the tumbling sequence are collected in the adjacent win counter and paid once the tumbling sequence of the round ends.
- The maximum win is up to 5000x the total bet during the base game and up to 4163.15x the total bet during the Free Spins Feature. When the Ante Bet is active the maximum win is up to 4000x the total bet during the base game and up to 3330.52x the total bet during the Free Spins Feature.

Bonus and Multiplier Symbols

- Bonus (Scatter) symbol represents the Scatter. 4 or more Bonus (Scatter) symbols appearing anywhere on the game board trigger the Free Spins Feature.
- No more than 6 Bonus (Scatter) symbols can appear on the game board per round.
- The Multiplier symbol can randomly appear during the base game and the Free Spins Feature. It stays on the game board until the end of the tumbling sequence. Whenever a Multiplier symbol lands, it appears with a random multiplier value from 2x, 3x, 4x, 5x, 6x, 8x, 10x, 12x, 15x, 20x, 25x, 50x, 100x, 250x to 500x the total bet.
- During the base game when the tumbling sequence ends, the values of all Multiplier symbols on the game board are summed up and the total win of the sequence is multiplied by this final value.
- The Free Spins Feature starts always with no Multiplier. During the Free Spins Feature when the tumbling sequence ends with a Multiplier on the game board for the first time, the value of the Multiplier symbols on the game board is summed up and the total win of the sequence is multiplied by this final value. This final value becomes the new Total Multiplier for the next spin. In the subsequent spins, if the tumbling sequence ends again with a Multiplier on the game board, the value of the Multiplier symbols is summed up, the Total Multiplier is also added to a final value and only then are the wins multiplied. This continues until the last round of the Free Spins Feature.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Tumble Feature

- After every spin in the Tumble Feature, winning combinations are paid and all winning symbols disappear from the game board. The remaining symbols fall down into empty positions of the game board and all other empty positions are replaced with symbols falling down from above.
- Tumbling will continue until no more winning combinations appear as a result of a tumble, this is called the tumbling sequence. All wins are added to the player's balance after the end of the tumbling sequence.
- Bonus and Multiplier symbols will not disappear.

Free Spins Feature

- 4 or more Bonus (Scatter) symbols that appear at any position on the game board during the base game triggers 15 Free Spins.
- The Multiplier symbol can randomly fall into the game board.
- The Multiplier symbol appears randomly during the Free Spins Feature. It stays on the game board until the end of the tumbling sequence. Whenever a Multiplier symbol lands, it appears with a random multiplier value from 2x to 500x.
- When the tumbling sequence ends, the value of all Multiplier symbols on the game board are summed up together, added to the Total Multiplier meter and the total win of the sequence is multiplied by this updated Total Multiplier meter value.

- Free Spins are played using the same bet as the spin which triggered them.
- The Free Spins Feature starts with 15 Free Spins. Whenever 3 or more Bonus (Scatter) symbols land on the game board during the Free Spins Feature, 5 additional Free Spins are awarded.
- No more than 4 Bonus (Scatter) symbols can appear on the game board during a Free Spins Feature spin.

Ante Bet

- Ante Bet can be activated only during the base game by clicking the ON button.
- Ante Bet can be deactivated at any point in the base game to return to the regular game mode by clicking the OFF button.
- The chances of triggering the Free Spins Feature can be doubled by activating Ante Bet. This will increase the Total bet amount to 125% of its current value.
- Ante Bet has the same RTP as the regular game mode.
- When starting a new session or entering a new machine, the Ante Bet is always deactivated, regardless of whether the state player ended the previous session or left the previous machine.
- Activating Ante Bet will disable the Buy Bonus Feature.

Buy Bonus

- The Buy Bonus can only be activated during the base game by clicking the Buy Bonus button.
- The Buy Bonus pop-up window shows the total price of the feature.
- Activation of the Buy Bonus guarantees a spin where 4 Bonus symbols land on the game board to trigger 15 Free Spins with the same rules as the regular Free Spins Feature.
- The price of this spin is displayed in the Buy Bonus pop-up window and will be deducted from your balance right after the activation.
- The Buy Bonus costs 100x of your current Total Bet.
- The theoretical RTP (return to player) for the Buy Bonus is 95.00 %.
