

Diamond Cash™: Mighty Aztec

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.25.
- The maximum bet per round is \$ 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 5 reels and 25 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when the Diamond Cash™ Feature is awarded.
- Autoplay stops automatically when the Colossal Free Spins Feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- The leftmost reel is reel 1, the rightmost reel is reel 5.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.
- Scatter symbols pay at any position on screen.

Bonus Symbols

- The Pyramid (Scatter) symbols may only appear on reels 2, 3 and 4.
- The Wild symbols may only land on reels 2, 3, 4 and 5.
- The Wild symbol substitutes for all symbols except for Scatter symbols to help complete winning combinations.
- The Wild symbol is also an Expanding symbol.

- If the Wild symbol is part of a win line, it expands to the full height of its reel, replacing all other symbols on that reel.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Diamond Cash™ Feature

- 6 or more Diamond symbols appearing anywhere on the reels trigger the Diamond Cash™ Feature.
- Diamond Cash™ Feature is played using the same bet as the spin which triggered it.
- The Diamond Cash™ Feature starts with 3 Free Spins.
- All Blue Diamond symbols from the base game convert to Pink Diamonds.
- The possible prize values that can be displayed on the Diamond symbols are Mini, Minor, Major or 1x, 2x, 3x, 4x, 5x, 15x, 20x, 100x multiplied by the total bet.
- The Free Spins counter is reset back to 3 with each new Diamond symbol appearing anywhere on the reels.
- All Diamond symbols are locked in place until the end of the Feature.
- During the Diamond Cash™ Feature, Mystery Chest symbols can land.
- These symbols are a visual stand in for Diamonds which have values of Mini, Minor, Major, 15x the total bet or higher.
- The values will be revealed at the end of the Diamond Cash™ Feature.
- The Mystery Chest symbols function as regular Diamonds and thus reset the Free Spins counter and count towards the trigger of the Grand Jackpot.
- Any numeric value on a Diamond symbol will be paid out at the end of the Diamond Cash™ Feature.
- All 15 positions filled with Diamonds or Mystery Chest symbols during the Diamond Cash™ Feature trigger the Grand Jackpot, which ends the feature immediately. The Grand Jackpot is awarded in addition to feature winnings.
- Within the same feature, only one Grand Jackpot or one Major Jackpot can be awarded.

Colossal Free Spins

- The feature is triggered by landing 3 Pyramid (Scatter) symbols on reels 2, 3 and 4.
- Colossal Free Spins Feature is played using the same bet as the spin which triggered it.
- Colossal Free Spins Feature starts with 6 Free Spins.
- During the Free Spins, reels 2, 3 and 4 merge into one colossal position.
- On the colossal position, only Colossal symbols can land.
- One Colossal symbol functions as 9 symbols of that kind.
- The Wild symbol can only land as a Colossal symbol or on the reel 5.
- If the Wild symbol lands on the colossal position, it does not expand.
- The Pyramid (Scatter) symbols can only land as a Colossal symbol.
- The Diamond symbols can only land as a Colossal symbol.

- If the Pyramid (Scatter) lands on the colossal position, 3 additional Free Spins are awarded. This can happen up to 3 times per feature.
- If the Diamond lands on the colossal position, the Diamond Cash™ Feature is triggered.
- The Colossal Diamond is converted into 9 Diamond symbols with random values at the beginning of the Diamond Cash™ Feature.
- When the Diamond Cash™ Feature ends, the game is transitioned back to the Colossal Free Spins, even in a case that no more Free Spins are available.

Jackpots

- 1.0 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- The jackpots are initially set at the base value of \$ 20 000.00/\$ 100 000.00 (or the equivalent in your account currency if different). When a jackpot is won, it is reset to the base value.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.

Gamble

- With your current stake, a maximum of \$ 50 000.00 can be bet while in the gamble feature.
- For higher wins or during autoplay, the gamble feature is not available.
- Any base game wins that coincide with a Diamond Cash™ Feature trigger are part of the feature game win and cannot be gambled.
- The feature game win of a Diamond Cash™ Feature is awarded directly and cannot be gambled.
