

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 5 000.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 3 reels and 5 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the payable.
- Symbol payout values shown in the payable are dynamic and change in accordance with the selected bet value.
- The leftmost reel is reel 1, the rightmost reel is reel 3.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines.
- Highest win only paid per selected line.
- Line wins are added.
- If winning combinations are achieved on all 5 win lines in the same spin with any winning combination in the base game or during the Magic Mandarin Re-spins, the win is then multiplied by 10.
- The particle animation that is landing on the capybara when a Wild symbol lands is purely visual and does not increase the likelihood of triggering Magic Mandarin Re-spins.
- The animation of "question mark" and "x10" on the head of capybara is purely visual and does not affect the value of multiplier, the multiplier is always x10.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.01 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Magic Mandarin Re-spins

- The Magic Mandarin Re-spins can be randomly triggered during the base game in two ways: at the beginning of any spin or at the end of a spin where at least one Wild symbol landed in.
- Depending on how the Magic Mandarin Re-spins was triggered, the feature will be as follows:
- When triggered randomly at the beginning of any spin, any regular symbol can be chosen to be the Lucky symbol, except the Wild symbol.
- When triggered at the end of a spin with a Wild symbol, one of the symbols that have already landed on the reels with the Wild symbol is chosen to be the Lucky symbol.
- Initially one re-spin is awarded and more additional re-spins are awarded, if at least one Lucky symbol or one Wild symbol lands on the reels.
- During the Magic Mandarin Re-spins only the Lucky symbol, Wild symbol, and blanks can land.
- The Magic Mandarin Re-spins feature ends when no symbols landed during the re-spin or when all positions are filled out with either Lucky symbols or Wild symbols.
- If a winning combination on all 5 win lines is achieved during the Magic Mandarin Re-spins the win is then multiplied by x10.
- The Wild symbol cannot be chosen as the Lucky symbol in the Magic Mandarin Re-spins.
- Up to 8 Wild symbols can land during the Magic Mandarin Re-spins.

Buy Bonus

- The Buy Bonus pop-up window shows the total price of the feature, which will be deducted from your balance immediately after activation.
- The Buy Bonus costs 50x the Total Bet.
- By confirming the bonus purchase, the Magic Mandarin Re-spins feature is triggered at the beginning of the spin and a random Lucky symbol is chosen before the feature starts.
- The Wild symbol cannot be chosen as a Random Lucky symbol in the Magic Mandarin Re-spins.
- The payable is not affected and pays the same as a game where the Buy Bonus has not been activated.
- The theoretical RTP (return to player) for the Buy Bonus is 94.01 %.

Gamble

- With your current stake, a maximum of \$ 500.00 can be bet while in the gamble feature.
- For higher wins or during autoplay, the gamble feature is not available.
