Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is $ 0.20.
- The maximum bet per round is $ 3 000.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 5 reels and 50 win lines in the base game and Free Games.
- You can find an overview of the win line pattern via "Paytable & Info".

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.

Winnings

- Winning combinations and payouts are made according to the paytable.

- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Scatter symbols pay regardless of their position.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.
- The leftmost reel is reel 1, the rightmost reel is reel 5.

Bonus Symbols

- The Wild symbol only appears on reels 2, 3, 4 and 5 during the Add Wild bonus.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.15 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.
- The RTP for the Buy Bonus is 94.05%.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 minutes absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Rumble Riches™

- Rumble Riches™ may trigger at any time during the base game or Free Games and will award either an Add Wild or an Add Coin feature.
- Add Coin - During a spin up to 6 Coin symbols may be randomly added to the reels.
- Landing 6 Coin symbols on the reels triggers Lock & Spin.
- All coins present on the reels when Lock & Spin is triggered are collected into a single Coin symbol, which is then displayed on the reels once the bonus begins.
- Add Coin can be triggered during both the base game and Free Games.
- Add Wild - During a base game or Free Games spin, 4 or more Wild symbols may randomly be added to reels 2, 3, 4 or 5.
- After an Add Wild has occurred, Coin symbols and Bonus scatter symbols may still land on the reels. If a Coin symbol or Bonus scatter symbol lands in the same position as an added Wild both symbols will be displayed together.
- The variation in the coin stack height is for entertainment purposes only and is not an indication of the likelihood of Lock & Spin being awarded.
