

Shrimp on the Barbie

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.10.
- The maximum bet per round is \$ 7 500.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win lines

- The game has 3 reels and 5 win lines, forming a 3x3 grid. The game also has 4 special reels, which are called Hot Reels and are located to the left, right, top and bottom of the grid with one position each.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the payable.
- Symbol payout values shown in the payable are dynamic and change in accordance with the selected bet value.
- The leftmost reel is reel 1, the rightmost reel is reel 3.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.

Bonus Symbols

- The Gas symbol is a Scatter symbol.
- 3 Gas symbols trigger the Cooking with Gas Bonus.
- The Wild symbol substitutes for all symbols except Scatters.
- The Wild symbol can become a Wild Multiplier symbol. In that case, it will act as a multiplier, multiplying the winnings.

- If 2 or more Wild Multiplier symbols appear on the same win line, the values of them are summed up before multiplying the winnings.
- It is impossible for 3 Gas symbols and a Wild to land on the same spin.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Hot Reels

- The game has four Hot Reels that spin with blank positions or Hot Reels Multipliers. The Hot Reels Multiplier values are x2 and x3 when the Order Up! is deactivated and x4 and x6 when the Double Multipliers option is selected in the Order Up! feature.
- If the Wild symbol and the Hot Reels Multiplier land on the same spin in the base game, the Hot Reels Multiplier value is transferred to the Wild symbol, following the logic:
- The leftmost Hot Reels Multiplier is added to the Wild symbol on reel 1.
- The top and bottom Hot Reels Multipliers are added to the Wild symbol on reel 2.
- The rightmost Hot Reels Multiplier is added to the Wild symbol on reel 3.
- If 3 Gas symbols and the Hot Reels Multiplier land on the same spin in the base game, the base game Hot Reels Multipliers sum is carried into the feature Wild Multiplier Pot.
- The Hot Reels Multipliers are added to the Wild Multiplier Pot every time they land in the feature.

Cooking with Gas Bonus

- 3 Gas symbols trigger the Cooking with Gas Bonus. 10 Free Spins with a Wild Multiplier Pot are awarded.
- During the Buy Bonus, 15 Free Spins can be awarded, if the Extra Hot option is chosen. Please see details on Buy Bonus section.
- Free Spins are played using the same Total Bet as the spin that triggered them.
- The starting Wild Multiplier Pot value is the sum of the base game Hot Reels Multipliers, if any. Otherwise, the starting Wild Multiplier Pot value is x1.
- Each Hot Reels Multiplier that appears during the feature is added to the Wild Multiplier Pot value.
- When Wild symbols are part of a winning combination, the value displayed in the Wild Multiplier Pot is transferred to each Wild symbol on the reels.
- Free Spins cannot be won again during the Cooking with Gas Bonus.

Order Up!

- Order Up! can be activated only during the base game by clicking the Order Up! button.
- The player has a choice between two Order Up! options in the game and the possibility to return to the regular game mode. The Order Up! pop-up window shows the options and the total cost of each one of them.

- More Wilds option costs 2x the selected Total Bet. In this option, the player has the chance of landing more Wild symbols than in the regular game mode.
- Double Multipliers option costs 3x the selected Total Bet. In this option, all Hot Reels Multipliers are doubled. Therefore, the Hot Reels Multiplier values can be x4 and x6.
- The player can return to the regular game mode at any point in the base game by clicking the Order Up! button and selecting Turn Off option.
- The Order Up! options work in the Cooking with Gas Bonus.
- Only one Order Up! option can be played at a time.
- The player cannot activate the Buy Bonus with the Order Up! enabled.
- The player cannot change the Order Up! options during the Cooking with Gas Bonus.
- The Order Up! options have the same RTP as the regular game mode.
- When starting a new session or entering a new machine, Order Up! is always deactivated, regardless of whether the state player ended the previous session or left the previous machine.

Gamble

- With your current stake, a maximum of \$ 500.00 can be bet while in the gamble feature.
- For higher wins or during autoplay, the gamble feature is not available.

Buy Bonus

- The Buy Bonus can be activated only during the base game by clicking the Buy Bonus button.
- The player has a choice between three Buy Bonus options in the game. The Buy Bonus pop-up window shows the options and the total cost of each one of them.
- The Mild option costs 50x the selected Total Bet. This option guarantees a spin that triggers the Cooking with Gas Bonus with 10 Free Spins and the starting Wild Multiplier Pot value from the range of x2 to x5.
- The Hot option costs 100x the selected Total Bet. This option guarantees a spin that triggers the Cooking with Gas Bonus with 10 Free Spins and the starting Wild Multiplier Pot value from the range of x5 to x12.
- The Extra Hot option costs 150x the selected Total Bet. This option guarantees a spin that triggers the Cooking with Gas Bonus with 15 Free Spins and the starting Wild Multiplier Pot value from the range of x5 to x12.
- The theoretical RTP (return to player) for the Buy Bonus is 95.00 %.
