

Silver Lux - Coin Run

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Game Modes

- The different game modes are:
 - 1) 1 reel for a bet of 1 credit.
 - 2) 2 reels for a bet of 5 credits.
 - 3) 3 reels for a bet of 10 credits.
- Choose the game mode and denomination via the "Total Bet" button.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The total bet depends on the selected game mode and the denomination value.
- The minimum bet per round is \$ 1.00.
- The maximum bet per round is \$ 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 3 reels and 1 win line.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.
- Autoplay does not stop automatically when a Respin is awarded.

Winnings

- Winning combinations and payouts are made according to the payable.
- Scatter symbols pay regardless of their position.
- Reels are counted from left to right, with 1 being the leftmost, and 3 being the rightmost reel.
- The "Mini" or "Minor" label on a Coin symbol represents the bonus displayed in the appropriate bonus meter.

- The “Major” or “Grand” label on a Coin symbol represents the jackpot displayed in the appropriate jackpot meter.
- The total win of each base game spin is the sum of all values and bonuses on the Coin symbols multiplied by any multiplier symbols on the win line and active reels, except for the Major and Grand Jackpot Coin symbols which are not multiplied.
- All values on the Coin symbols are presented in credits.
- The values in the “Mini” and “Minor” bonus meter are presented in credits.
- The values in the “Major” and “Grand” jackpot are presented in currency.

Bonus Symbols

- The 2x, 3x and 5x Multiplier symbols are multipliers and multiply the winnings by 2, 3 or 5, respectively.
- More than 1 Multiplier symbol may be included in a winning combination. When this happens, each multiplier will multiply the winnings.
- The multipliers don’t multiply the Grand Jackpot or Major Jackpot.

RTP Range

- The theoretical RTP (return to player) value for this game is 96.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Progressive Free Games Meters

- Each game mode and denomination has a corresponding progressive Free Games Meter.
- The game modes 1, 2 and 3 have the initial value on the progressive Free Games Meter as 5, 6 and 7 Free Games, respectively.
- The number of Free Games in the progressive Free Games Meter corresponds to the current bet level and increases as the game is played, up to a maximum of 15 Free Games.
- Changing the game mode or the denomination will reset any progress that has been achieved with the progressive Free Games Meter. If the game mode or denomination is changed back to a previous level, the progress of that level will be restored.
- The pile of coins, which grows by every increment of the progressive Free Games Meter, gives no indication of the chance of triggering the Free Games.

Free Games

- Free Games are triggered on a random chance with the amount of Free Games indicated by the progressive Free Games Meter.
- When the progressive Free Games Meter reaches 15 Free Games, Free Games automatically will be triggered with 15 Free Games.
- Free Games ends when 0 Free Games remain.
- After the Free Games have ended, the progressive Free Games Meter is reset to its initial value.
- Free Games can’t be won during Free Games.
- During Free Games all complete symbols in view will pay.
- Free Games are played at the same total bet and game mode as the triggering game.

- The total win of each Free Game spin is the sum of all values and bonuses on the Coin symbols multiplied by any multiplier on the view and active reels, except for the Major and Grand Jackpot Coin symbols which are not multiplied.

Respin

- When a spin results in 1 or more multiplier symbols on the active reels of the win line but without a win, the multiplier symbols will be held and one respin will be awarded.

Jackpots

- 1.5 % of every stake made on mode 3 (playing with 3 reels for a bet of 10 credits) goes directly into the jackpot.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.
- The base win of each jackpot depends on your stake. The base win is 1000 times your stake for the Grand Jackpot, 250 times your stake for the Major Jackpot.
- The Grand Jackpot will be awarded when a Coin symbol with the label "Grand" appears on any active win line.
- The Major Jackpot will be awarded when a Coin symbol with the label "Major" appears on any active win line.

USER INTERFACE

Buttons

The table below lists the different buttons found in the game and describes their functions.

Start: Start a game round at the current bet level.

Total Bet: See available bet options.
Choose the number of credits to play and the denomination via the "Total Bet" button.
CREDITS

Credits: Select the number of credits you want to play. If this button is greyed out, you cannot change the credits you want to play.
DENOMINATION

Denomination: Select the denomination value you want to play.

Auto: Start Autoplay
(for more details on Autoplay see the "Game Rules" section).

Open the menu to access:
The payable, deposit options, settings, replay mode or help screen.
You can find more details on the available menu options below.

In the payable: Click the arrow buttons to scroll through the payable. Pressing "X" brings you back to the game again.

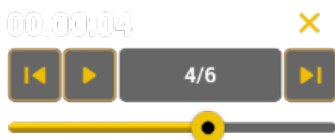

Exit: Exit the game.

Change sound settings (sound & music, sound only or sound off).

Toggle between fullscreen and windowed mode.

In replay mode: Press left or right to step through your last played rounds.
Press the "Play" button to see the complete round again.
When playing on a mobile or tablet, you can move the buttons by dragging and dropping them to the positions you want.

Keyboard Input

The table below lists the supported keyboard shortcuts and describes their functions.

Space

- Starts a new round.
- Collects your current winnings.
- Triggers a fast stop of the running reels.

Left Arrow

- Decreases the current bet until the minimum possible bet has been reached.

Right Arrow

- Increases the current bet until the maximum possible bet has been reached.

Up Arrow

- Increases the current CREDITS until the maximum possible CREDITS has been reached.

Down Arrow

- Decreases the current CREDITS until the minimum possible CREDITS has been reached.

Tab

- Opens the payable.
- Navigates to the next page when pressed while the payable is in view.
- Closes the payable again when pressed on the last page.

Paytable & Info

- The payable lists the symbols, winning combinations and payouts of the game.
- The payable always shows the prizes for the currently selected bet and number of lines.
- It consists of multiple pages which can be accessed by using the arrow buttons.

Replay

- With the replay option you are able to rewatch your previous rounds.
- For an overview about the controls in replay mode find details in the user interface table above.

Help

- This button displays the ingame help.

Exiting the game

- You can exit the game at the end of each round.
