

Silver Lux - Extra Dice

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The total bet depends on the selected number of credits and the denomination value.
- The game is played with 50 credits.
- Choose the denomination via the "Total Bet" button.
- The minimum bet per round is \$ 0.50.
- The maximum bet per round is \$ 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 3 reels and 5 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.
- Autoplay stops automatically when the Grand or Major is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Scatter symbols pay at any position on screen.
- Highest win only paid on each selected line and per scatter combination. Scatter wins and line wins are added.
- The leftmost reel is reel 1, the rightmost reel is reel 3.
- All prizes are presented in credits except the Grand and Major Jackpot which are presented in the actual currency.

Bonus Symbols

- Extra Dice 5x is a Wild Multiplier and substitutes any symbol except Extra Dice, Extra Dice 2x, Extra Dice 3x and Dice.
- Each Extra Dice 5x that is included on a line win multiplies the win by 5.
- Extra Dice 3x is a Wild Multiplier and substitutes any symbol except Extra Dice, Extra Dice 2x, Extra Dice 5x and Dice.
- Each Extra Dice 3x that is included on a line win multiplies the win by 3.
- Extra Dice 2x is a Wild Multiplier and substitutes any symbol except Extra Dice, Extra Dice 3x, Extra Dice 5x and Dice.
- Each Extra Dice 2x that is included on a line win multiplies the win by 2.
- Extra Dice is a Wild and substitutes any symbol except Extra Dice 2x, Extra Dice 3x, Extra Dice 5x and Dice.
- More than 1 multiplier may be included on a line win and can multiply the winnings up to 15x.
- Line win combinations must contain at least one symbol other than Extra Dice, Extra Dice 2x, Extra Dice 3x or Extra Dice 5x to activate the multipliers.
- When the line win is made entirely from Wild symbols, the payout is considered according to the payable without activating the multipliers.
- 3 scattered Dice symbols will trigger the Dice Feature.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Respin Feature

- When a spin resulted in 2 scattered Dice symbols in the reel window, the reels containing the Dice symbols will be held and one free respin will be awarded.

Dice Feature

- 3 scattered Dice symbols will trigger the Dice Feature.
- Press the 'Stop' button to stop the Dice reel.
- The number of eyes on the stopped Dice symbol indicates the number of win spins that are won.
- Win spins are played at trigger bet and lines.
- A win spin also can result in a retrigger of the feature.
- The possible Dice outcomes when the feature is triggered are: 3, 4, 5 and 6. During retrigger, the possible Dice outcomes are: 1, 2, 3, 4, 5 and 6.
- The obtained win spins will be added to the remaining ones.
- In case there are more than 6 remaining win spins this will be indicated by a fast-flashing 6th dice.
- After hitting or retriggering the Dice Feature the next multiplier will be illuminated. Feature wins will be multiplied by the highest multiplier which is illuminated.

- The Major Jackpot and Grand Jackpot are exempt from multiplication when won in the Dice Feature.
- In case the multiplier reaches a value of "5x" during the Dice Feature, the feature can't be re-triggered anymore.

Jackpots

- 1.5 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.
- The base win of each jackpot depends on your stake. The base win is 1000 times your stake for the Grand Jackpot, 250 times your stake for the Major Jackpot.
