- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The total bet depends on the selected number of credits and the denomination value.
- The game is played with 200 credits.
- Choose the denomination via the "Total Bet" button.
- The minimum bet per round is \$ 2.00.
- The maximum bet per round is \$ 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 3 reels and 27 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Bonus Win Patterns

- When all 9 active positions contain the symbols 2x, Red Seven, Green Seven or Blue Seven stacked on the reels, a bonus win will be awarded in addition to the line wins.
- You can find an overview of the bonus win patterns via "Paytable and Info".

Winnings

- Winning combinations and payouts are made according to the payable.
- Reels are counted from left to right, with 1 being the leftmost, and 3 being the rightmost reel.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines.
- Highest win only paid per selected line. All wins pay only on lines in play.
- Line wins are added.
- All prizes are presented in credits except the Grand and Major Jackpot which are presented in the actual currency.

Bonus Symbols

- The 2x symbol is a Wild Multiplier and substitutes any symbol.
- Each 2x symbol included in a line win multiplies the win by 2.
- More than one 2x symbol may be included in a line win and can multiply the winnings up to 4x.

- Line win combinations must contain at least one symbol other than the 2x symbol to activate the multipliers.
- When the line win is made entirely from 2x symbols, the payout is considered according to the payable without activating the multipliers.
- The Grand Jackpot and the Major Jackpot are never multiplied.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

- The Respin Feature cannot be retrigged within the same game round.

Jackpots

- 1.5 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
