

Strike It Gold™: Win Ways™

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 20.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Ways™

- This game has 6 main reels and 1 top reel.
- Wins are awarded from left to right on adjacent symbols.
- The top reel contains 4 symbols. Each symbol is added to the reel directly below on reels 2, 3, 4 and 5.
- Each main reel with or without the top reel symbols can contain up to 7 symbols. Each spin can have a maximum of 117649 Win Ways to win.

Reactions

- Every winning symbol is part of a reaction and is replaced by symbols coming from above on the main reels and from the right on the top reel.

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- Highest win is only paid per combination on screen.
- Scatter symbols in any position trigger the feature game.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.

RTP Range

- The theoretical RTP (return to player) value for this game is 96.07 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Free Spins

- Free Spins are played at trigger bet.

Increasing Win Multiplier

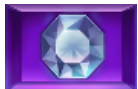

- The Increasing Win Multiplier starts at one and increases by one after each reaction. Wins from each reaction are multiplied by the Increasing Win Multiplier.

Gamble

- With your current stake, a maximum of \$ 500.00 can be bet while in the gamble feature.
- For higher wins or during autoplay, the gamble feature is not available.
