Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is € 0.20.
- The maximum bet per round is € 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.
- A player cannot influence the result of a game by stopping the reel spins.

- This game has 5 reels and 5 win lines.

Winnings

- The leftmost reel is reel 1, the rightmost reel is reel 5.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Highest win only paid on each selected line and per scatter combination. Scatter wins and line wins are added.

Bonus Symbols

- 6 or more Disc symbols appearing anywhere on the reels trigger the Lock & Spin Feature.

RTP Range

- The theoretical RTP (return to player) value for this game is 93.70 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 15 seconds absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.
