

Thunder Cash™ - Swiss Magic

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 50.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

ALLPAY™

- The game has 5 reels and 243 winning ways.

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the payable.
- Symbol payout values shown in the payable are dynamic and change in accordance with the selected bet value.
- The leftmost reel is reel 1, the rightmost reel is reel 5.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right, except scatters.
- Only the highest win per way and per scatter combination is paid.
- Scatter wins and way wins are added.

Bonus Symbols

- 6 or more Coin symbols appearing anywhere on the reels trigger the Lock & Spin Feature.
- The Wild symbol substitutes for all symbols except for Scatter symbols to help complete winning combinations.
- Wild symbols may only appear on reels 2, 3 and 4.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Lock & Spin Feature

- The Lock & Spin Feature starts with 3 Free Spins.
- Free Spins are played using the same bet as the spin that triggered them.
- The Free Spins counter is reset back to 3 with each new Coin symbol appearing anywhere on the reels.
- All Coin symbols are locked in place until the end of the feature.
- Any numeric value on a Coin symbol will be paid out at the end of the Lock & Spin Feature.
- Major/Minor/Mini Jackpot Coin symbols appearing anywhere on the reels in the Lock & Spin Feature trigger the corresponding jackpot payout (at the end of the Lock & Spin Feature).
- 15 Coin symbols appearing on the reels during the Lock & Spin Feature trigger the Grand Jackpot and end the feature immediately.

Jackpots

- 0.95 % of every stake goes directly into the jackpots.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- The jackpots are initially seeded at \$ 2 500.00 / \$ 15 000.00 (or the equivalent in your account currency if different). When a jackpot is won, it is reset to the seed value.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.

Gamble

- With current bet it is possible to gamble any win up to 5 times with a maximum stake of \$ 250.00.
- For higher wins or during autoplay, the gamble feature is not available.
- The gamble feature is not available after a jackpot win.

- Any base game wins that coincide with a Lock & Spin Feature trigger are part of the feature game win and cannot be gambled.
- The feature game win of a Lock & Spin Feature is awarded directly and cannot be gambled.
