

WILD LINES™: American Eagle

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 30.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- Wild Lines™: American Eagle has 3 reels and 1 win line, which can be expanded up to 11 in the Feature Game.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Only the highest win per line is paid.
- Winning combinations and payouts are made according to the payable.
- Symbol payout values shown in the payable are dynamic and change in accordance with the selected bet value.
- Cherry symbols act as a "Line-Scatter": They are counted on any position on a win line, and any additional Eagles on this line are added (and their multipliers applied).
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Reels are counted from left to right, with 1 being the leftmost and 3 being the rightmost reel.

Bonus Symbols

- Scatter - The 'Wheel of Freedom' symbol landing on the middle position of the middle reel triggers the Wheel of Freedom followed by the Feature Game.
- Wild - All 'Eagle' and 'Locking Eagle' symbols are wild and act as Multipliers for non-Eagle winning combinations.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Feature Game - Wild Lines™

- Landing the Wheel of Freedom symbol on the middle position of the middle reel, grants one spin on the Wheel of Freedom.
- 5, 7, or 11 Free Spins are initially awarded, depending on the result shown on the outer wheel of the Wheel of Freedom spin.
- A different modifier is awarded for the Wild Lines™ Feature, depending on the result shown on the inner wheel of the Wheel of Freedom spin.
- Steel mode: The middle reel has regular symbols followed by empty spaces, as in the base game.
- Gold mode: The middle reel has only Eagles without any empty spaces between them.
- Diamond mode: The middle reel has only Eagle x3 symbols without any empty spaces between them.
- Free Spins are played using the same bet as the spin which triggered them.
- Free Spins cannot be retriggered.

Nudge Feature

- All reels can be nudged one step up or down, and in doing so, maybe create a winning situation.

Reel Lock Feature

- Reel 1 or 3 or both get locked for the next spin when a Locking Eagle lands on the win line 1 on either of those reels. If there are any wins on the current spin, those are paid out normally, as well as the wins on the second spin.
- The second spin is a new round (it is not a re-spin) and the player has to bet the same amount as for the first spin. If only one reel gets locked and on a second spin the Locking Eagle symbol lands on the other non-locked reel, then both of them stay locked for another spin and the process is repeated.
- If the Feature game is won while the reels are locked, they remain locked as they would in the base game for another spin.
- Reels locking is active in the base game as well as in the Wild Lines™ Feature.
- The Nudge Feature on the middle reel can also happen during this Feature.
- If a reel is locked, the bet cannot be changed before the next spin.

Billboard

- The amount of coins shown on the Billboard at the first spin of the game and after each win is a purely visual representation of the denomination value of what you have won that round, and does not represent an additional win, or a collection mechanic, of any kind.
- The winning value shown on the Billboard is the amount of coins. This is calculated as: winning value divided by the total bet and multiplied times 2.

Gambling

- With your current stake, a maximum of \$ 500.00 can be bet while gambling.
- For higher wins, Free Spins wins or autoplay, gambling is not possible.

SYMBOLS

The table below lists the winning symbols of this game.

Eagle x3

Locking Eagle x3

Eagle x2

Locking Eagle x2

Eagle

USER INTERFACE

Buttons

The table below lists the different buttons found in the game and describes their functions.

Start: Start a game round at the current bet level.

Total Bet: See available bet options or press + or - to increase or decrease your current bet.

Max Bet: Set your bet to the maximum available bet.

Auto: Start Autoplay
(for more details on Autoplay see the "Game Rules" section).

Lines: Change the number of lines. If this button is greyed out, you cannot change the number of lines.

Open the menu to access:
The payable, deposit options, settings, replay mode or help screen.
You can find more details on the available menu options below.

In "Settings": Toggle the "Gambling" switch from "Off" to "On" to turn on the option to gamble your winnings during the game.

Gamble: Enter the "Gamble Game" where you can double your winnings with odds of 50:50. For more details on the Gamble Feature, see the "Game Features" section.

In the payable: click the arrow buttons to scroll through the payable. Pressing "X" brings you back to the game again.

Exit: Exit the game.

Change sound settings (sound & music, sound only or sound off).

Toggle between fullscreen and windowed mode.

In replay mode: press left or right to step through your last played rounds.

Press the "Play" button to see the complete round again.

When playing on a mobile or tablet, you can move the buttons by dragging and dropping them to the positions you want.

Keyboard Input

The table below lists the supported keyboard shortcuts and describes their functions.

Space

- Starts a new round.
- Collects your current winnings.
- Triggers a fast stop of the running reels.

Left Arrow

- Decreases the current bet until the minimum possible bet has been reached.
- Starts the gamble feature when your current winnings can be gambled.
- Chooses the red card during the gamble feature.

Right Arrow

- Increases the current bet until the maximum possible bet has been reached.

- Starts the gamble feature when your current winnings can be gambled.
- Chooses the black card during the gamble feature.

Tab

- Opens the payable.
- Navigates to the next page when pressed while the payable is in view.
- Closes the payable again when pressed on the last page.

Paytable & Info

- The payable lists the symbols, winning combinations and payouts of the game.
- The payable always shows the prizes for the currently selected bet and number of lines.
- It consists of multiple pages which can be accessed by using the arrow buttons.

Replay

- With the replay option you are able to rewatch your previous rounds.
- For an overview about the controls in replay mode find details in the user interface table above.

Help

- This button displays the ingame help.

Exiting the game

- You can exit the game at the end of each round.
