

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 1.00.
- The maximum bet per round is \$ 20.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Ways

- Wings of Fortune™ has 5 reels and 243 winning ways.

Autoplay

Clicking on "Auto" will bring up the Autoplay-dialogue where you can configure the following options before starting the automatic spins:

- The number of rounds you want Autoplay to be active.
- The loss limit at which Autoplay should stop.
- The win limit at which Autoplay should stop after meeting or exceeding it.
- By clicking "OK", you start the automatic spins with the chosen configuration.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- Highest win is only paid per combination on screen.
- Wild (Blue) substitutes for all symbols except for Wild (Red) to help complete winning combinations.
- Wild (Red) substitutes for all symbols to help complete winning combinations.
- Wilds can substitute for Bonus symbols to help complete winning combinations.
- 3 or more Bonus symbols in a winning combination awards 10 FREE GAMES.
- Win ways are added.
- All wins start on the leftmost reel and are for combinations on adjacent reels.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.
- Malfunction voids all pays and plays.

GAME FEATURES

Free Games Feature

- 3, 4 or 5 Bonus symbols, left to right on screen, awards the Free Games Feature.
- 10 Free Games are played with royal symbols (A, K, Q, J, 10 and 9) removed from the reels.
- Free Games are played using the same bet as the spin which triggered them.
- Free Games can be won again during the Free Games.

Jackpot Feature

- When the Jackpot Feature is triggered, 12 Coins appear. Touch a Coin to reveal a "Lucky Phoenix". Find 3 Matching Phoenixes to win the respective Jackpot and complete the Jackpot Feature.

Jackpots

- The base currency of this game may be different to the currency of your account. When that is the case, the progressive jackpot is shown at its current value in your account currency. That amount may go up or down depending on fluctuations in exchange rates.
- 1.4% of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- The amount you are eligible to win will be shown in the jackpot bank.
- When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win.
- Each jackpot is the sum of its base win plus the contributions from all players to this jackpot.
- The base win of each jackpot depends on your stake. The base win is 800 times your stake for the Major Jackpot and 10000 times your stake for the Grand Jackpot.
- It is not possible for two players to win the jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- Subsequent players will win the reseeded jackpot, plus any new contributions.
- There is no ceiling value for the jackpots.
